PROFESSIONAL SUMMARY

Full-stack mobile developer and Computer Science student building deployed apps with React Native, Expo, TypeScript and Supabase, owning everything from Postgres schemas, RLS and edge functions to tested Android and web clients. Mobile front-end developer, QA and Scrum Master on a team marketplace thesis with ML-based matching and escrow payments. Builds test-first with Jest, Vitest, Playwright and Maestro E2E automation, using AI-assisted and agentic workflows to ship faster.

EDUCATION

De La Salle Lipa, Bachelor of Science in Computer Science — Expected Graduation: 2027

SKILLS

Languages: TypeScript, JavaScript, Python, SQL (PostgreSQL, PL/pgSQL), C++, Luau, HTML/CSS

Frameworks: React Native, Expo (Router, EAS), React, Next.js, NestJS, Vite, Tailwind CSS, TanStack Query, React Three Fiber, Arduino (ESP32)

Databases & Tools: Supabase (Postgres, Auth, RLS, Edge Functions, Realtime, Storage), Git/GitHub, GitHub Actions, Vercel, Jest, React Native Testing Library, Vitest, Playwright, Maestro, Blynk IoT, Roblox Studio, Gemini, Groq & OpenAI-compatible LLM APIs, Xendit API, Claude Code

Concepts: SDLC, Agile/Scrum, Software Testing & Quality Assurance, AI-Assisted & Agentic Development, AI Agent Orchestration, REST API Integration, Model Context Protocol (MCP), Prompt & Context Engineering, AI Workflow Optimization

CERTIFICATIONS

freeCodeCamp: JavaScript Algorithms and Data Structures; Relational Database

DataCamp: SQL Associate; Python Data Associate; AI Engineer for Developers Associate; Introduction to Python for Developers; AI Ethics; Introduction to Data Ethics; Introduction to Data Quality

PROJECTS

Eiyu System | React Native, Expo, React, TypeScript, Supabase, Jest, Vitest, Maestro | eiyu-system.vercel.app

- Built a gamified habit tracker as a monorepo with an Expo Android app, a Vite/React web app on Vercel and a shared TypeScript logic package, backed by 46 Supabase SQL migrations with RLS and server-side XP functions.
- Added offline completion sync, an Android home-screen widget, and AI weekly summaries through a Supabase Edge Function with multi-provider failover and per-user quotas. Tested with 230+ test files, 60+ Maestro E2E flows and GitHub Actions CI.

TaskBuddy (Thesis) | React Native, Expo, NestJS, Next.js, FastAPI, Supabase, Xendit

- Built mobile client and provider screens plus backend contributions (chat, uploads, verifications, auth) for a home-services marketplace with ML-based provider matching and escrow payments, including end-to-end chat attachments and push-notification routing.
- Set up the mobile Jest + React Native Testing Library harness and Maestro E2E flows, and ran QA and UAT rounds, fixing the release blockers they found.

StarkRent | React Native, Expo, TypeScript, Supabase

- Built a construction-equipment rental app with role-based customer and admin flows, rental requests and extensions, realtime chat and analytics, backed by Postgres triggers and RLS policies and covered by 17 Maestro E2E tests.

DeskPulse: ESP32 Study Monitor | ESP32, Arduino C++, Blynk IoT

- Rebuilt an IoT desk monitor as modular, non-blocking firmware with presence, sound and climate sensors, an OLED display, Pomodoro focus scoring and Blynk dashboard alerts, verified by 100+ host-side unit tests.

Welcome to Lipa City (Roblox) | Luau, Roblox Studio

- Developed most of a Roblox tour of Lipa City landmarks with code-generated sites, NPC guides and a passport-stamp system, verified by Luau unit tests and automated build checks.

CleanOps | Next.js, Supabase, PostGIS

- QA tester for a cleaning-services marketplace with geolocation and escrow: wrote test cases and bug reports, and ran unit, integration, E2E, smoke and regression/UAT testing.

mal-voice-assistant | Python, Groq API

- Built a Windows voice assistant with Groq Whisper speech-to-text, multi-turn LLM chat and SAPI text-to-speech.

RELEVANT EXPERIENCE

Mobile Front-End Developer, QA & Scrum Master | TaskBuddy (Thesis Project)

QA Tester | CleanOps (Academic Team Project)

Lead Developer | Welcome to Lipa City (Group Project), built about 80% of the game and integrated team PRs

WHAT I'M SEEKING

Open to: Internships | Freelance engagements | Entry-level roles | F2F/Remote/Hybrid

Focus Areas: Full-stack mobile development | Full-stack web development | Game Development | AI-Augmented Development Workflows
